

Planter Technology Sub-irrigation Systems

"CWC" Series Classic For Clay, Terra Cotta And Other Tapered Planters

"CWC" Series Classic Planter Irrigation System

- *Designed For Interior & Exterior Use*
- *Keeps Plants Healthy, Strong And Stress Free By Balancing Moisture And Oxygen Levels In The Soil At All Times*
- *Integrated Exterior Drainage Adaptor Allows Excess Rainfall To Escape Without Disturbing The System*
- *Will Not Leak Or Sweat, Prevents Staining Of Terra Cotta Pots*
- *Large Fill-Hole Accommodates A Garden Hose For Easy Filling*

How The Controlled Watering System Balances Moisture And Oxygen Levels

When the soil is dry, the moisture sensor allows air to pass through the tube into the reservoir, allowing water to flow into the container from the bottom. The water wicks through the soil, irrigating the plant.

As the soil becomes moist, the sensor absorbs water. When wet, the sensor acts as a valve, blocking the flow of air through the tube. A vacuum is created above the reservoir, preventing further watering until the soil begins to dry again.

"CWF" Flower Bowl Container Irrigation System

- *Holds Enough Water To Last Up To 2 Weeks Before Refilling*
- *Comes Complete With Overflow Drainage Adaptor*
- *May Be Fully Planted And Prepared Off-Site For Quick And Easy Change-outs*
